

What are Wi-Fi pods and how do I use them?

Looking for a specific topic?

I want to know more about:

- Fixing an offline pod
- The difference between Wi-Fi Pod and Wi-Fi Pod mini
- Improving speeds through my pods
- Troubleshooting my Whole Home Wi-Fi pods

Looking for support with the Bell Wi-Fi app?

Visit bell.ca/wifiapp to learn how to use the Bell Wi-Fi app for things like sharing your Wi-Fi password, managing your devices, and setting up parental controls.

What are Wi-Fi pods?

Wi-Fi pods are additional Wi-Fi access points that are placed throughout your home. They work together with our Giga Hub, Home Hub 4000, 3000 or 2000 modems to create a seamless, powerful Wi-Fi mesh network in every room of your home.

Bell offers three different types of Wi-Fi pods depending on your Internet service or modem type.

- Wi-Fi 6E Pod** – Available to Fibe Internet customers with a Giga Hub modem
- Wi-Fi Pod** – Available to Fibe Internet customers with Home Hub 4000, 3000 or 2000 modems
- Wi-Fi Pod Mini** – Available to Wireless Home Internet customers
