Protecting our customers is a priority for Bell and cybersecurity is an important part of our business. We want to help you remain safe whenever you use our products and services to navigate and interact online.

At Bell:

- We monitor our network 24/7 for suspicious activity and we have security capabilities embedded in our network.

- We protect our network and our customers from millions of attacks daily.

- We design and build our products and services with security in mind.

- We work collaboratively with governments and industry groups to exchange cybersecurity threat information.

- We have safeguards in place to securely handle personal information and protect your privacy, and we will never request personal information in our communications.

Effectively securing your online presence requires not only using services from a trusted partner like Bell, but also being more knowledgeable as a user.
